

## SD-Internet

# Reliable Cloud Performance for the Digital SMB

SD-Internet is the smart cloud connectivity solution that delivers superior performance for businesses who need unbreakable access to mission-critical cloud applications.

Built for the digital small to mid-sized business, SD-Internet is a managed network service that reduces IT cost and complexity while improving cloud performance and reliability.

## Adaptiv SD-Internet Features

### NETWORK-AS-A-SERVICE

One simple site license includes everything you need for your managed SD-Internet experience.

### CLOUD-BASED MANAGEMENT

A certified service provider manages your network through our centralized cloud portal.

### AUTOMATIC SITE FAILOVER

Seamless failover instantly reacts to keep your entire branch network connected.

### BI-DIRECTIONAL QOS

We prioritize and protect priority network traffic to ensure voice quality over broadband.

### MULTI-LINK AGGREGATION

Combine multiple links to increase bandwidth and reliability for your business network.

## Benefits of SD-Internet

### REDUCE OPEX

Economies of scale for your bandwidth and IT budget.

### INCREASE RELIABILITY

Always-on connectivity for business critical cloud services.

### NETWORK AGILITY

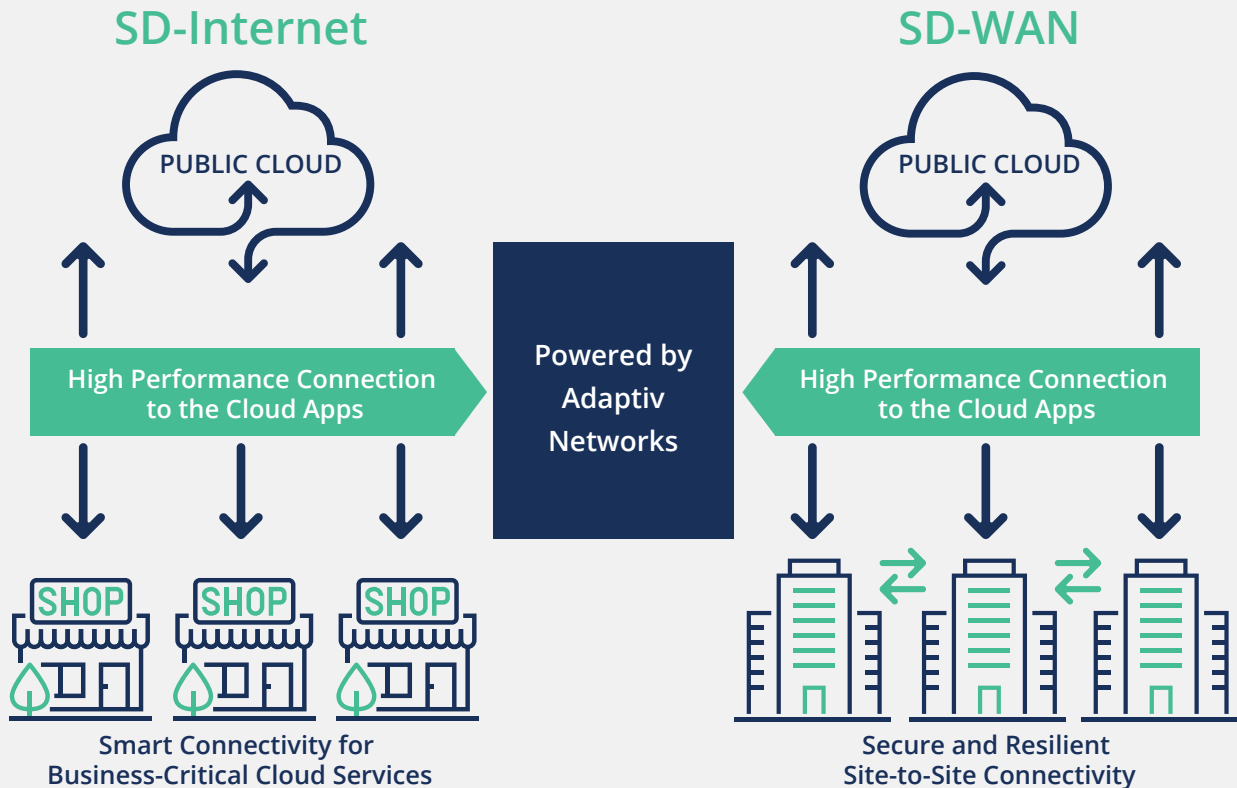

Quickly and easily add new sites or increase bandwidth.

### CLOUD PRODUCTIVITY

Faster and more responsive connections to business cloud apps.

## Adaptiv Networks Products

## Adaptiv Networks Solutions

We create smart business networks as a simple cloud-managed service that deliver a better network experience so you can focus on your business instead of your network.
