ADAPTIV ENTERPRISE CONNECT

Secure, agile SD-WAN connectivity for the distributed enterprise

Simple and efficient cloud-managed networks that deliver superior reliability and performance for cloud services and private applications.

Customer Benefits

NETWORK-AS-A-SERVICE
A managed network experience that eliminates hidden costs and reduces strain on your IT team.

APPLICATION AWARENESS
Automatically recognizes and prioritizes business applications to optimize user experiences.

MULTI-LINK AGGREGATION
Combines any broadband, MPLS or LTE connections into a smarter and faster branch office network.

UNBREAKABLE INTERNET
Seamless failover instantly reacts to keep your entire branch connected through link outages.

SUPERIOR CALL QUALITY
Protects voice and video calls from network congestion with no dropped calls on failover.

SCALES EASILY
Quickly and easily increase bandwidth, add new sites or provide secure access for remote workers.

Why Customers Buy

REDUCE OPEX
Economies of scale for your bandwidth and IT budget.

ELIMINATE DOWNTIME
Always-on connectivity stays connected through link outages.

CLOUD PERFORMANCE
Faster and more responsive access to cloud services.

VISIBILITY AND CONTROL
Cloud portal shows health for sites, links and applications.

Adaptiv Enterprise Connect Features

Our solution provides advanced networking features powered by our SD-WAN Cloud, backed by our world-class support team, and delivered with the simplicity of a managed service.

NETWORK ORCHESTRATION

- Cloud management portal
- Zero-touch provisioning
- Site status and configuration
- Application-level visibility and control
- Link monitoring and configuration tools
- Bandwidth utilization reporting
- Remote troubleshooting tools

SMART CONNECTIVITY

- Multi-link aggregation
- Intelligent session-based path steering
- Seamless link failover
- Application recognition
- Bi-directional application priority
- Prioritize public cloud applications
- Prioritize private corporate applications

BRANCH NETWORKING

- Cloud-managed edge device
- Full DHCP Server
- NAT: port / IP forwarding***
- IP addresses available*
- High availability with dual edge devices*

SECURITY

- Site-to-site data encryption
- Encrypted Internet access
- Zero Trust Network Access (ZTNA)
- Stateful branch firewall
- URL & DNS filtering[1]
- Secure Web Gateway (SWG/Web Filter/Safe Search)[2]
- Next Gen Firewall (UTM/AI/ML/AV/IDPS/DLP)[2]
- Deep Content Inspection[2]
- AI-based threat detection[2]
- Bring your own firewall support

NETWORK ROUTING

- Intelligent cloud gateway
- Internet breakout at the gateway
- Internet breakout at the branch (optional)
- Private IP address (CGNAT for gateway traffic)
- Bandwidth throughput up to 2Gbps
- LTE link support
- MPLS / private link support

* Not included in the base license price
** LTE available on the edge device, LTE service sold separately
*** For local breakout traffic only
